

**Amendments to the Specification**

Please amend the paragraph beginning on page 10, line 3, as follows:

But in the present invention shown in Fig. 4, in order to form the light-transmitting region 9 represented by a gap, the edges of the lower side and the right side of the reflecting film 3 (adjacent gate line 25 and data line 24) have regular gaps to prevent adjacent films 3 from contacting each other. Also, in order to form a storage capacitance, the edges of the upper side and the left side in the reflecting film 3 ~~entirely overlap with the greater part of the~~ gate line 25 and the data line 24.
